Celebal Assignment-7

Navigate to Monitor:

1. Select **Monitor** from the left-hand menu.

Create an Alert Rule:

1. Click **+ New Alert Rule**.

Select the VM Resource:

1. Choose the VM you want to monitor.

Configure Condition:

1. Add a condition for **Available memory**.
2. Set the threshold (e.g., memory usage > 80%).

Define Action Groups:

1. Add action groups to specify notifications (email, SMS) and automated actions.

Set Alert Details:

1. Name the alert rule, provide a description, and set the severity level.

Review and Create:

1. Review the configuration and click **Create alert rule**.

Database Monitoring

Select the Database Resource:

1. In **Monitor**, create a new alert rule and choose the database resource.

Add Conditions:

1. Select metrics like **DTU percentage**, **CPU percentage**, etc.
2. Set threshold values.

Define Action Groups:

1. Use existing action groups or create new ones for notifications and actions.

Configure Alert Rule Details:

1. Name the alert, add a description, and set the severity.

Review and Create:

1. Review and click **Create alert rule**.

This is a summary of your action group. Please review to ensure the information is correct and consider Azure Mon
Statement.
